

Figure 1: Bar chart showing L43E: SCC2-51 expression levels across various tissues and cell lines. The y-axis represents 'Copies L43E / 1000 Copies actin' ranging from 0 to 4000. The x-axis lists various tissues and cell lines. The chart shows high expression levels in several tissues, particularly in the Pituitary Gland (638A) and Adrenal Gland (356A), and in several cell lines, including Small Cell - Cell Line (HTB 173) and Small Cell - Cell Line (NCI H128).
